Changing Signs Made Easy

Signs are the silent salesman! They work 24 hours per day, 365 days per year, and are most effective when they look fresh, sharp and reflect your business as it is today! When the same sign is displayed day in, day out it becomes featureless 'wallpaper', and it has been proven that passers-by simply won't 'see' it anymore, let alone the message you are attempting to convey. Without a doubt, old signs fail to get noticed.

People the world over love to see something new and eye catching, but the problem is that changing your signage is typically difficult, time consuming and expensive. If only there was a way to easily change your signs without the hassle and expense. At last – there is!

Introducing SignTrax - the high-speed, effortless way to change low-cost signs from the safety of ground level - anywhere, anytime.

Your message can be changed in seconds using SignTrax's unique, patented installation system. SignTrax reinvents the way signage can be used for the eye-catching presentation of your brand or message in promotional, event, or retail environments.

Signs installed in seconds

SignTrax™ allows signs to be raised or lowered within seconds via a special track or pole from the safety and convenience of ground level.

It's easy to raise and lower SignTrax Signs:

1. Insert the key, unlock the sign bracket and lower.
2. Fit the SignTrax Sign to the bracket and secure.
3. Raise the SignTrax Sign and lock into position.

CONVENIENT

SignTrax creates easy to access and highly viable media spaces ready for your message to be displayed, removed or replaced in seconds.

COST EFFECTIVE

SignTrax will provide years of service. Pay only for new signage as and when required.

SECURE

SignTrax allows signage to be positioned safely out of reach and secured in place with a tamper proof lock.

SIMPLE, FAST INSTALLATION

SignTrax signage require no tools or special skills to install.

SAVE ON INSTALLATION COSTS

Anyone can install SignTrax signage in a fraction of the time taken to install similar signs or custom banners that require specialist labour.

UNMATCHED VERSATILITY

Create multiple display configurations by changing the shape or size of your signage.

EYE-CATCHING

SignTrax signage is displayed above vehicle and pedestrian traffic ensuring good visibility and strong branding to create a lasting impression.

SignTraxTM

**Making it easy to
change your message in
seconds**

A versatile easy-change wall and pole mounted sign display

SignTrax

SignTrax is available in a track or free standing pole configuration.

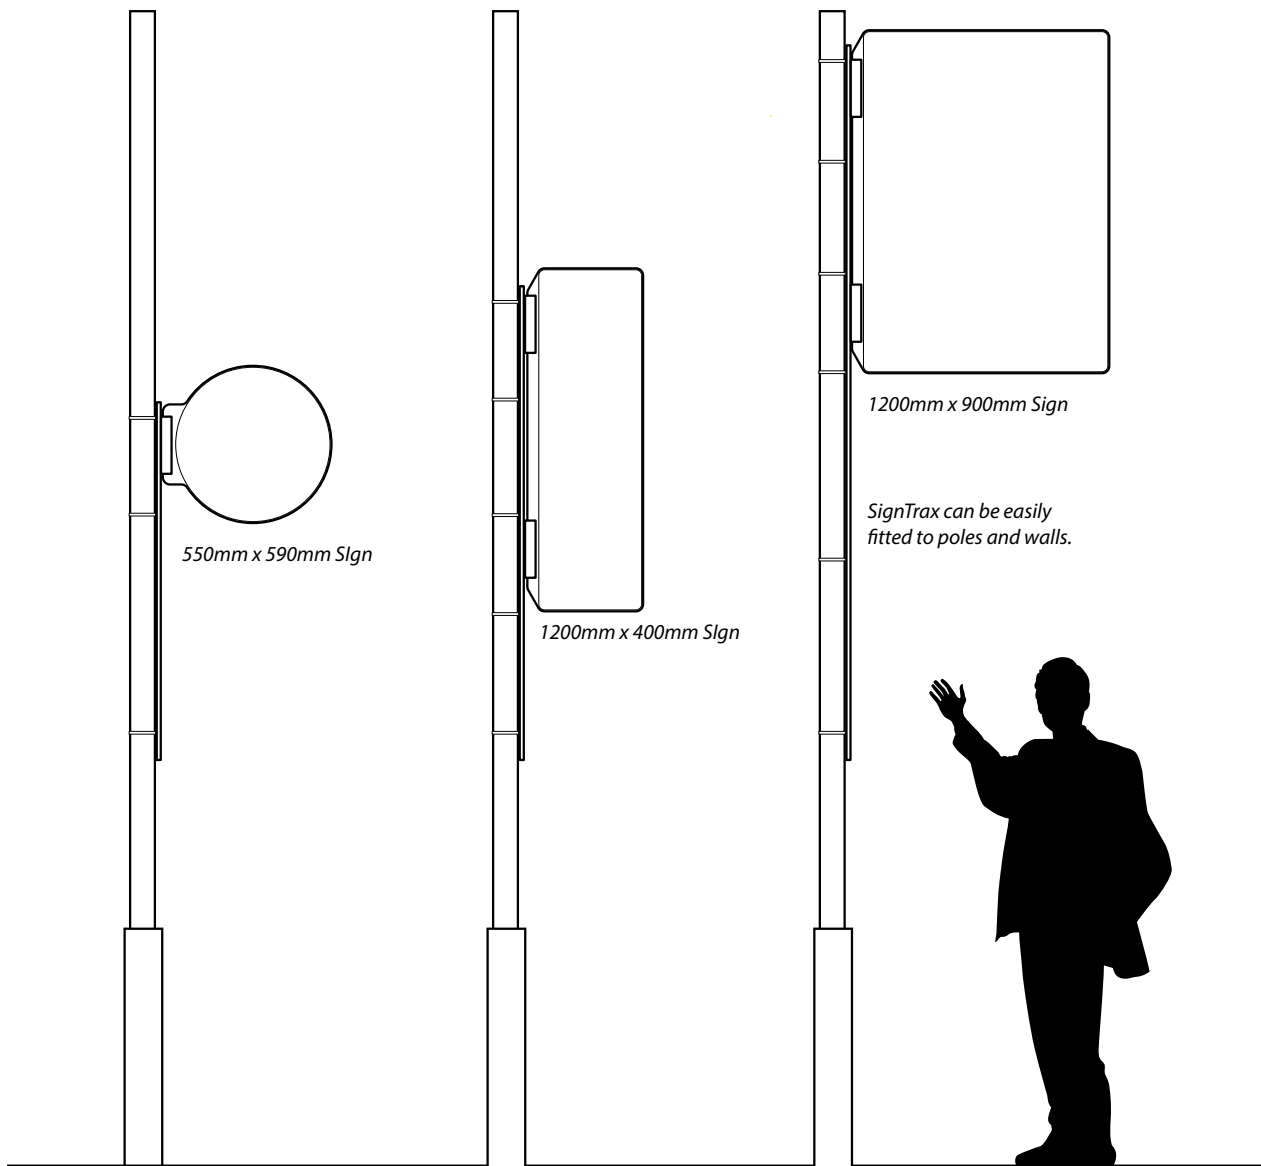

SignTrax Track can be installed on almost any suitable vertical surface including walls, light poles, lighting columns, round or octagonal steel or concrete poles, wooden poles, as well as mounting to suitable stand-alone fixed poles etc. SignTrax tracks are low profile and inconspicuous when no signs are being displayed.

Signs can be mounted at right angles or perpendicular to the SignTrax Track, are available in several standard sizes or can be configured to meet your requirements.

Mounting Options

For permanent installations SignTrax Signpoles can be fitted into existing or new ground sockets made for 60mm diameter poles. This is a standard size pole socket used throughout New Zealand for traffic and parking signage.

SignTrax Signpoles are also available with a surface mount which is perfect for installations where a ground socket cannot be used. The mount stands 300mm tall with a 200mm square plate and four 12mm fixing holes (fixings not included) and a grub screw for securing the pole.

SignTrax Signpoles can also be used for exhibitions and events where a semi-permanent signpole is required. The pole is supplied with 20kg portable steel base with a 600mm square plate. The base is suitable for interior use and can be weighted or pegged for additional support when used outside.

SignTrax Signpole

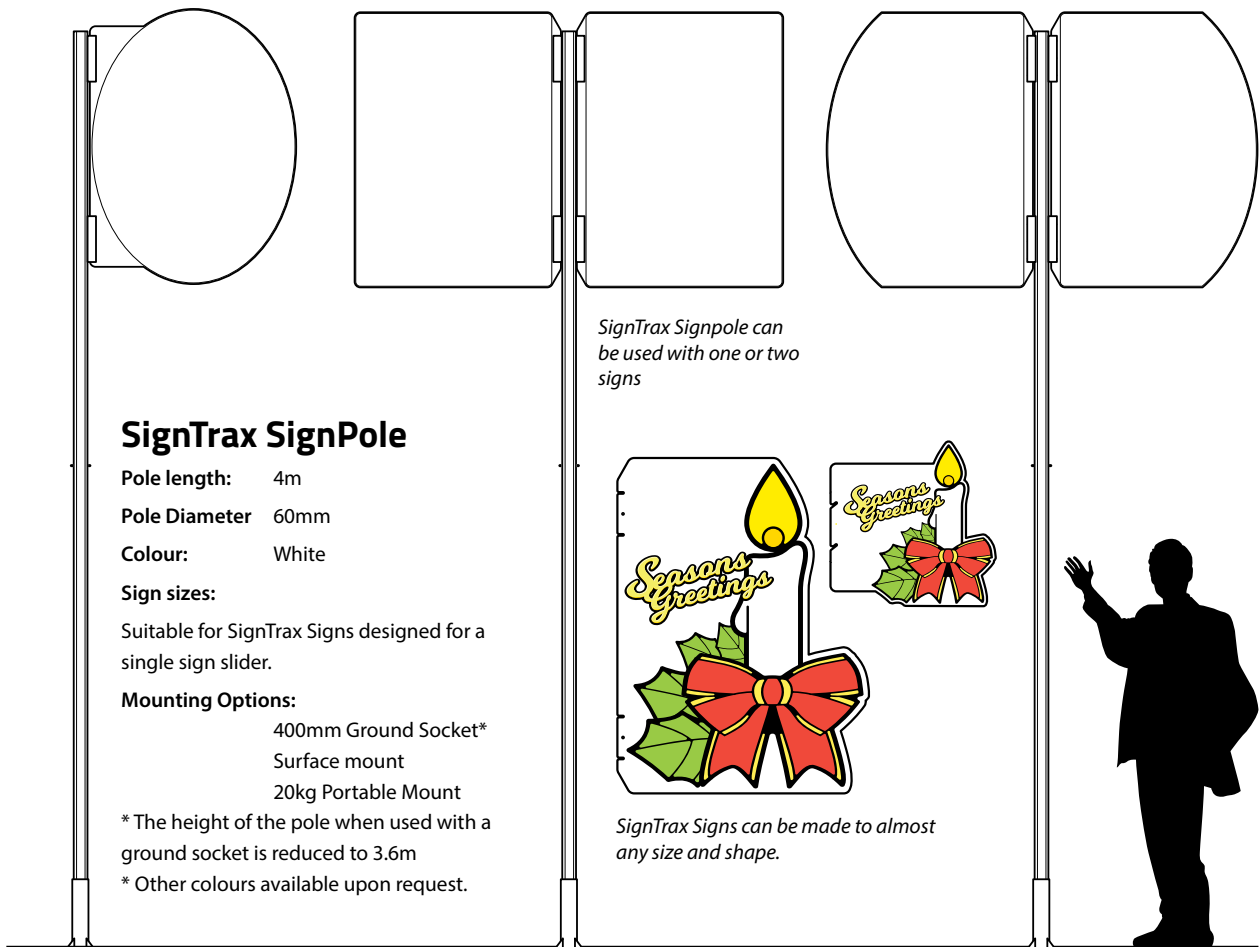

The SignTrax Signpole is an impressive free-standing 4m sign display with over 4m² of usable display area.

Signs can be raised and changed with ease and the double sided printed sign ensure your message is always visible in all weather conditions.

SignTrax Signs

SignTrax signs are fitted to the SignTrax raising mechanism by a specially designed bracket and are fully self-supporting.

The base material for SignTrax Signs is 5mm coreflute, a cost effective, light weight and durable material perfect for screen-printing, digital printing and for use with vinyl. SignTrax Signs can be made to almost any size and shape.

To achieve the level of durability required for exterior use, SignTrax Signs are reinforced with high-strength pultruded fibreglass rods, embedded into the structure of the sign. This feature adds strength yet allows the sign to flex and spill the wind, reducing wind loading. Large light-weight signs can be used without risk of damage to the sign, the support structure or the SignTrax system.

SignTrax Signs tested in strong winds

SignTrax™ is Patent Protected

SignTrax™ incorporates the patented PushPull™ System developed in New Zealand by Nexus Developments Limited. The system allows flags, street flags, banners, lighting, signage (or other objects), to be conveniently raised, lowered or repositioned, typically in difficult to reach areas.

Patents: New Zealand 544347

Design Registrations: New Zealand 422618, 422908, 409728

The SignTrax logo is displayed on a yellow background, which is part of a larger image showing a yellow flag or banner. The background image is overlaid with a white diamond-shaped grid pattern. The logo itself consists of the word "SignTrax" in a bold, italicized, sans-serif font, with "Sign" in black and "Trax" in white. Below the logo, the text "Patent Protected" is visible, followed by a reference to the website "www.signtrax.nz for full details".
